85.28%

## OBJECTIVE

Highly motivated and detail-oriented Computer Science student seeking an internship/entry-level position to apply my strong technical skills and theoretical knowledge in a professional work environment. Eager to contribute to innovative projects and gain practical experience in software development and problem-solving.

## SKILLS

java

HTML5

CSS

Python

JavaScript

Node

MongoDB

## PROJECTS

### Movie-finder

- It is a website that allows users to search for movie information using the Open Movie Database (OMDB) API. The website also includes login and registration pages that are built using PHP and MySQL. Users can create an account and login. The website provides an easy way to find and gather information about movies.

### To-do app

- Programmed a to-do app that allows users to make lists.
- Added a function that allows users to cross items off their list.
- Included an organization feature so users can search for and filter their lists.
